Welcome to the 2010 Nanotechnology for the Forest Industry Conference!

What makes this 10th international conference Nanotechnology for the Forest Industry Conference unique is first that it is being held in one of the most technically advanced locations in Europe, Espoo in Finland, and secondly that it boasts 90+ presentations and more than 40 posters. Truly, every attendee should leave with a full plate of new insights into the realm of nanomaterials and new forest related products.

There is a burgeoning emphasis on novel composites that harness the remarkable properties of crystalline cellulose. Besides four sessions devoted to nanocellulosics and nanocomposites, the program boasts fundamental sessions on structured materials, interfacial micromechanics, as well as thin films and interfacial assemblies. Nanotech coatings promise new functionalities for forest products in the wood, paper and packaging sectors. Reflecting the need for new products that are differentiated via nanotech coatings, there are three sessions devoted to this topic plus a related session on nanomaterials and barriers.

Optimization of nanomaterials and composites is facilitated by modeling and by new characterization techniques. For example, fully engaging the strength and stiffness of nanocrystalline cellulose in composites has yet to reach the level of development seen in rival composite materials such as carbon fiber reinforced plastics. The importance of this optimization process is seen in a keynote and two sessions devoted to computer modeling, and two sessions on novel characterization techniques.

The development of products based on nanotechnology must also be put in the context of market opportunities, consumer acceptance, health concerns, and regulatory control. This is the subject of keynote and plenary talks as well as two sessions. Finally, there are two principal paths for the creation of nanocellulosics, often referred to as NCC and MFC (or NFC). We will explore their relative merits and applicability to new products in a panel discussion with representatives of outfits with the most advanced production facilities. Since these facilities need to be integrated into existing pulp mills, and since economic viability also depends on value-added use of the materials that are dissolved to produce crystalline cellulose we have also included a session on nanocellulosics and the biorefinery.

While the conference has a challenging program, we have provided lots of opportunities for networking. A vital part of the conference is the poster and tabletop displays and we have built in multiple opportunities to have face-to-face discussions with students, researchers, and suppliers working on various aspects of this exciting new discipline in the forest industry. The host institute, VTT, is also opening its doors to conference attendees and has also scheduled workshops on topics related to the conference theme for Thursday and Friday. Welcome to a full engagement meeting on the most exciting development area in forest products arena!

Prof. Bruce Lyne, The Royal Institute of Technology
Prof. Kristiina Oksman, Luleå Technical University

Conference Co-chairs
Thank You

to the 2010 Nanotechnology Conference Theme Leaders

Ali Harlin, VTT
Anne-Christine Ritschkoff, VTT
Lori Sheremeta, Alberta Ingenuity
Jo Anne Shatkin, CLF Ventures, Inc. (an affiliate of the Conservation Law Foundation)
Orlando Rojas, North Carolina State University
Stan Stayanov, The National Institute for Nanotechnology National Research Council of Canada
Phil Jones, Imerys
Hiroyuki Yano, Kyoto University
Ted Wegner, USDA Forest Service Forest Products Laboratory
Bruce Lyne, Royal Institute of Technology
Kristiina Oksman, Luleå University of Technology
John Kettle, VTT
Hamdy Khalil, Woodbridge Group
John Cowie, AFPA
Siqun Wang, Tennessee Forest Products Center
Pia Qvintus, VTT
Tamal Gosh, PepsiCo

Conference Co-Chairs:

Bruce Lyne, Royal Institute of Technology
Kristiina Oksman, Luleå University of Technology

TAPPI Onsite Team:

John Harrison, VP, Global Planning, Meetings & Membership
Raine Hyde, Technical Program Lead
Dr. Hiroyuki Yano
Professor, Research Institute of Sustainable Humanosphere, Kyoto University
Monday, 27 September 2010, 12:30-14:00

Dr. Yano is a Professor at the Research Institute of Sustainable Humanosphere, Kyoto University. He received his Ph.D. in wood science from Kyoto University in 1989. He joined Kyoto Prefectural University as assistant professor in 1987 and later moved to the Wood Research Institute at Kyoto University as associate professor in 1998. During 1997-1998 he was a Visiting Scientist at the Forest Products Laboratories at CSIRO, Australia.

He received the Young Scientist Award from the Japan Wood Research Society in 1989, Hayashi Jisuke Award from the Cellulose Society of Japan in 2005, and the Japan Wood Research Society Award from the Japan Wood Research Society in 2009. He is a fellow of the International Academy of Wood Science.

His research involves extraction of nanofibers from biomass resources such as wood, plant fibers, and crab and shrimp shells, and their utilization as a component of nanomaterials for optical and structural purposes.

Andriy Kovalenko
Senior Research Officer, Group Leader – Theory and Modeling, NRC-NINT Adjunct Professor, Department of Mechanical Engineering, University of Alberta
Tuesday, 28 September 2010, 08:00-08:45

Dr. Kovalenko is a leading, internationally recognized expert in theoretical and computational methods of modeling on multiple space and time scales, including statistical physics and electronic structure theory. His focus is development of theoretical methods capable of predicting the behaviour of nanosystems. He has proposed a new statistical-mechanical molecular theory of solvation, which bridges the gap between electronic structure, atomistic simulations, and system functioning. He has applied it to provide realistic description of physical and chemical properties and processes in various nanosystems: complex molecular liquids; electronic and solvation structure and thermodynamics in solution and at solid–liquid and liquid–liquid interfaces; chemical reactions and nanocatalysis in solution; electrochemistry of solutions sorbed in nanoporous materials; polymers in solutions and melts; transport of nanoparticles across biomembranes and liquid interfaces; self-assembly, conformational stability and aggregation of supramolecules and biomolecules in solution.

Hadi Mahabadi
Vice President and Center Manager, Xerox Research Centre of Canada (XRCC)
Wednesday, 29 September 2010, 08:00-08:45

Dr. Mahabadi joined Xerox in 1981 and has held a variety of managerial positions at XRCC. He has been instrumental in creating an environment to increase innovation and successful commercialization of many breakthrough materials technologies at XRCC. Examples include novel solid inks for Xerox ink jet printers and Emulsion Aggregation toner for many Xerox products introduced into the market after 2000.

Dr. Mahabadi’s R&D leadership efforts earned many awards including two of Xerox Corporation’s highest awards. He won the University of Waterloo’s 2008 Alumni Achievement Medal. He was also ranked as #1 among PrintAction Magazine’s 50 most influential Canadians in Graphic Art Communications for 2008 and 2009. Mahabadi was selected as a Fellow of the Chemical Institute of Canada, Canadian Academy of Engineering, International Union of Pure and Applied Chemistry. He recently became the Chair of the Chemical Institute of Canada.

Dr. Mahabadi has also been involved in helping to shape science and technology strategy and direction in Canada while advancing the science and technology agenda nationally and internationally. He has served on national and regional committees, taskforces, and boards of several science and technology related organizations.
10:30 - 11:00

**POSTER SESSION, TABLETOP EXHIBIT AND PRODUCT DEMOS**, Upper Lobby

**10:30 - 11:00**

**BREAK, Upper Lobby**

**11:00 - 12:30**

**3 NANOTECH COATINGS AND NEW NANO-ENABLED FUNCTIONALITIES - PART 2, Hall 1**

- **Inkjet Printing of Functional Nanoparticles**, Ramin R. Farnoud - University of Toronto
- **Ultra-Thin Coatings of Paper by Tailor-Made Nanoparticles**, Tiina Nypelö - Aalto University
- **Reduction of the Linting and Dusting Tendency of Newsprint by Using Nanocellulose Coatings**, Mikael Ankerfors - Innventia AB

**12:30 - 14:00**

**LUNCH – KEYNOTE: Potential of Cellulose Nanofiber-Based Materials, Hall 2**

Dr. Hirokuni Yama, Professor, Research Institute of Sustainable Humanosphere, Kyoto University

**14:00 - 15:30**

**5 ORGANIZED STRUCTURES AND INTERACTIONS - PART 1: MATERIALS AND INTERACTIONS, Hall 1**

- **Adhesion and Nanotribology of Biofibres**, Mark W. Rutland - KTH
- **Cellulose Nanocrystals: Novel Templates for the Synthesis of Nanostructures**, Robert Moon - Purdue University
- **Heterogeneous Modification of Cellulose Nanocrystals and Surface Assemblies**, Aki Fujii-Pippono - Aalto and NC State University
- **Nanofibrillar Cellulose - In Vitro Study of Cytotoxic and Genotoxic Properties**, Marja Pitkänen - VTT
- **Stability of Cellulose Nanocrystal Suspensions in Electrolyte and Polymer Solutions**, Roman Budak - University of Alberta

**15:30 - 16:00**

**BREAK, Upper Lobby**

**16:00 - 17:30**

**7 ORGANIZED STRUCTURES, PART 2: THIN FILMS AND INTERFACIAL ASSEMBLIES, Hall 1**

- **Ultra Thin Films of Oriented Cellulose Nanocrystals by Electric Field-Assisted Convergent Assembly**, L. Lisko - University of West Hungary
- **Unusual Morphology in Ultrathin Cellulose Derivative Blend Films**, Laura Nydén - Åbo University
- **Structure of Nanofibrillated Cellulose Monolayers at the Oil/Water Interface**, Khanha Kao - Norwegian University of Science and Technology (NTNU)
- **Hydrophobiisation of Pulp Fiber with Multilayering of Saponified Resin and PAM**, Sungrin Lee - Seoul National University

**17:30 - 18:00**

**POSTER SESSION, TABLETOP EXHIBIT AND PRODUCT DEMOS, Upper Lobby**

**8 CHARACTERIZATION TECHNIQUES - PART 1, Hall 1**

- **Cellulose Nanocrystal Size Distribution Determination by Transient Electric Birefringence**, John Simonsen - Oregon State University
- **Anisotropic Elasticity of Crystalline Cellulose: Atomic Modeling and Experiments**, Achile Martino - Purdue University
- **Crystallinities of Nanocrystalline and Nanofibrillated Celluloses by FT-Raman Spectroscopy**, Umesh Agarwal - Forest Products Laboratory
- **Influence of Fibrillation Degree and Surface Grafting of Micro-Fibrillated Cellulose on Their Rheological Behavior in Aqueous Suspension**, Julian Bras - LGP2 Laboratory of Pulp and Paper Science
- **Microstructural Characterization of Cellulose Nanofibers Extracted from Different Sources**, Sandra K. Tadokoro, Aji P. Mathew, Kristiina Oksman - Luleå University of Technology

**8 CHARACTERIZATION TECHNIQUES - PART 2, Hall 1**

- **Interfacial Micromechanics of Tunicate and Cotton Viscose Polymer Nanocomposites Using Raman Spectroscopy**, Dr. Stephen Eichhorn - University of Manchester
- **Influence of Fibrillation Method on the Character of Nanofibrillated Cellulose (NFCs)**, T. Feller, T. Lappalainen, I. Remmel, P. Eronen, P. Hiekkanen, A. Vehlinen, I. Kääriäinen, The Finnish Center for Nanocellulosic Technologies, VTT Technical Research Centre of Finland, Aalto University, School of Science and Technology, Pontin, M.Kummev Oj
- **Characterization of Nanofibrillated Cellulose Samples Using X-ray scattering, Microtomography, Scanning and Transmission Electron Microscopy**, Kirsi Leppänen - University of Helsinki
- **The Rheological Behavior of High-Aspect-Ratio Nanocelluloses from Softwood Fluar**, Luolamies

**9 CHARACTERIZATION TECHNIQUES - PART 1, Hall 1**

- **The Influence of Nano Coatings on the hygroscopic Stability of Cellulose Nanocrystal Suspensions**, Ulla Forsström - VTT
- **Grafting of Micro-Fibrillated Cellulose on Their Nanoscale Cellulose Fibrils – Potential for Further Extension of the Mechanical Property Range in Fibrous Networks**, Jana Mårtensson - Hall 2
- **Nanoscale Cellulose Fibris – Potential for Further Extension of the Mechanical Property Range in Fibrous Networks**, Lars Berglund – KTH
- **TEMPO-Oxidized Cellulose Nanofibers Prepared from Chemical Wood Pulps**, Akiya Iogun – University of Tokyo
- **Surface Plasmon Resonance and Other Surface Sensitive Techniques**, Ankerfors – Innventia AB
- **Rheological Behavior in Aqueous Suspension**, Sandra K. Tadokoro, Aji P. Mathew, Kristiina Oksman – Luleå University of Technology
- **The Influence of Nano Coatings on the hygroscopic Stability of Cellulose Nanocrystal Suspensions**, Ulla Forsström - VTT
- **Nanoscale Cellulose Fibris – Potential for Further Extension of the Mechanical Property Range in Fibrous Networks**, Jana Mårtensson - Hall 2
- **Nanoscale Cellulose Fibris – Potential for Further Extension of the Mechanical Property Range in Fibrous Networks**, Jana Mårtensson - Hall 2
- **Nanoscale Cellulose Fibris – Potential for Further Extension of the Mechanical Property Range in Fibrous Networks**, Jana Mårtensson - Hall 2
15 NANOCELLULOSICS AND NEW NANO-ENABLED FUNCTIONALITIES, Half 1

- NanoCoating Close to the Market, Moritz Eulenburg-Colonna Coating Machinery GmbH
- Using Thin-Crystal Engineered Kaolins to Enhance Mechanical Properties of Coatings, John Husband – Imerys
- Rheological Behavior of Different Bio-based Nanoparticles Suspensions, Julien Bras - Laboratory of Pulp and Paper Science

16 POSTER SESSION, TABLETOP EXHIBIT AND PRODUCT DEMOS, Upper Lobby

17 CRUISE AND DINNER
Join your fellow delegates for a cruise to Suomenlinna, and dinner at the famous Walhalla Restaurant. Suomenlinna, one of islands off Helsinki, was built as a maritime fortress in the mid-18th century during the Swedish era. Today, it is a UNESCO World Heritage Site and one of Finland's most popular tourist attractions.

Restaurant Walhalla was built into the fortress as Helsinki prepared itself for the 1952 Olympic Games. The name of the restaurant is inspired by the Walhalla secret society that in the 1780s conspired against the Swedish king Gustav III. The name of the secret society, Walhalla, is from Scandinavian mythology, and is the place in the after world where heroes and warriors enjoyed an eternal feast.

Buses will depart from Dipoli at 18:30 for the harbour. Buses will return from the harbour at 21:30 to Dipoli first, then the Sokos Hotel Tapiola Gardens. A separate registration is required for this event. Registration includes roundtrip ground transportation, the round trip cruise and food and beverage. Cost is $148, 122.

18 KEYNOTE ADDRESS: BIO BASED NANO PARTICLE AND GREENER PRINTING INDUSTRY, Hall 1
Hadi Mahabadi – Vice President and Center Manager Xerox Research Centre of Canada
Additional Events Hosted by VTT

**Friday, 24 September**

**FUNCTIONAL MATERIALS WORKSHOP**

**Thursday, 30 September**

08:30-12:00 - VTT Workshop - “Safety on Nanocellulose”
12:00 - 13:00 - Lunch
13:00 - 17:00 - EU FP7 project “Promine” Information Day

**Friday, 1 October**

09:00 - 12:00 - Tour of VTT

There is no charge for these events. Separate registration is required.
### Program Grid

**Registration: Gala Lobby**

**Speaker Room: Klondyke**

Precise Determination of (Nano)particle Emissions from Paper Surfaces via Acoustic Waves,
Andreas Kornherr, Mondi Uncoated Fine Paper

Modeling the Rheology of Nanocellulose Suspensions,
A. Puisto, Aalto University, School of Science and Technology

Multiscale Modeling, Synthesis, and Application of Multifunctional Gelators,
Sergey Gusarov and Andriy Kovalenko, University of Alberta

Coarse-Grained Material Properties for Fiber-Based Materials from Computer Simulations,
Mikko Alava, Aalto University

Atomistic Modeling of Cellulose Nanofibrils: Elastic Properties,
J. L. McWhirter and Sami Paavilainen, TUT

Atomistic Modeling of Cellulose Nanofibrils and Their Interactions,
S. Paavilainen, TUT

Theory and Modeling at Multiple Scales for Understanding Supramolecular Self-Assembly, Solvation Effects, and Gelation,
Stanislav R. Stoyanov, National Institute for Nanotechnology, National Research Council of Canada

Cellulose Fibers and Nanofibrils for Adhesive Reinforcement,
Stefan Veigel, University of Natural Resources and Applied Life Sciences

Cellulose Nanofiber (CNF) for Nanocomposites Production: Opportunities and Challenges,
Hossein Yousefi, University of Tehran

Preparation of Cellulose Nanofibrils from Short Staple Cotton Fibers / Cotton Linters by Homogenization and its Characterization,
A. K. Bharimalla, Central Institute for Research on Cotton Technology, Matunga, Mumbai

Enzymatic and Acid Hydrolysis of Sisal Fibers: Morphological Aspects of Nanoparticles and Influence on the Mechanical Properties of Nanocomposites,
Gilberto Siqueira, PAGORA

Bacterial Cellulose Biocomposites Based on Epoxidized Soy Bean Oil and Gelatin Matrices,
C. Peña, University of the Basque Country

Studies on Electrospun Chitosan Based Nanofibres Reinforced with Cellulose and Chitin Nanowhiskers,
Valencia Jacobs, Luleå University of Technology

Thermoplastic Composites Reinforced by Nanofibrils of Cellulose,
Yousoo Han, University of Maine

Physicochemical Characterization of Nanofiber of Different Treatment on Kenaf Bast Fiber,
Alireza Shakeri, Golestan University

Flexible Filler Nanocellulose Structures,
Katariina Torvinen and Jenni Sievanen, VTT

Bacterial Cellulose Coated “Hairy” Sisal Fibres for Renewable Hierarchical Composites,
Anne Delille, Imperial College London

Cellulosic Nanocomposites Reinforced with Nanocrystals Isolated from Hardwood Residues and Hybrid Poplar,
Jingxin Wang, West Virginia University

Water-binding Capacity of Nanofibrillar Cellulose,
Monika Österberg, Aalto University
Nano-fibrillation of Wood Pulp Using a High-Speed Blender, Kojiro UEetani, Kyoto University

Composite Materials of Cellulose Nanofibers and Natural Rubber, Takeshi Nakatani, Kyoto University

Nanocellulose based Materials with High Performances, Hanna Lönnberg, SweTree Technologies AB

Preparation and Characterization on Cellulose Nanofiber Paper, Liyuan Zhang, Deakin University

Mechanical Behavior of Recycled Fibers Coated by Silver Nanoparticles, L. Csoka, University of West Hungary

Aligned Cellulose Nanocrystals Deposited on Flat Supports by Convective Assembly, Ingrid C. Hoeger, North Carolina State University

Poly(N-isopropylacrylamide) brushes grafted from Cellulose Nanocrystals via Surface-Initiated Atom Transfer Radical Polymerization (SI-ATRP), Justin Zoppe, North Carolina State University

Optically Transparent Organic-Inorganic Hybrid Materials (OIH) Based on BC and Bohemite- Glycidoxypropyltrimethoxysilane (Boe-GPTS) Systems, Hernane S. Barud, São Paulo State University-UNESP

Photocromic Organic-Inorganic Hybrid (OIHs) Based on Bacterial Cellulose and Polioxometalate (POM), Hernane S. Barud, São Paulo State University-UNESP

Influence of Nanoclay on Physical and Mechanical Properties of Bio Fiber/ Plastic Composite, Hossein Khanjanzadeh and Taghi Tabarsa, Gorgan University

Nanosized Coatings on Paper Using Electrospinning/Spraying Process, P. Hekkilä, TUT

Nanoscale Surface Processing with Atmospheric Plasma Technique, Johanna Lahti, TUT

Gas and Moisture Barrier on Bio-based Packaging Materials by Atomic Layer Deposition, Terhi Hirvikorpi, VTT

Papers Coated with a MODIFIED Pigment Obtained by in Situ Synthesis of Silica Film on PCC, José A.F. Gamelas, University of Coimbra

Thin Coatings for the Paper by Foam Coating, Karita Kinnunen, Tuomo Hjelt, Eija Kenttä, VTT

Controlled Wetability of Paperboard by Nanoparticles Using Liquid Flame Spray Process, Milena Stepien, AA/TUT

Nanofibrillated Cellulose as Carrier of (Nano) Particles, Kirsi Kataja, VTT

Using Nanofibrillated Celluse to Improve Biomaterials Properties for Packaging Applications, Susana Aucejo Romero, Packaging, Transport & Logistics Research Center

Modifying Contact Angles on Lignin Surfaces By the Application Of Silica Nanoparticles, Lei Dong, Tiina Nypelö, Monika Österberg, Janne Laine, and Mikko Alava, Aalto University

Cellulose Nanoparticles and Alginate Encapsulation for Their Use in Extrusion Process, Julien Bras - Laboratory of Pulp and Paper Science

Processing and Characterization of Melt Spun Bio-Nanocomposite Fibres, Maya Jacob John & Aji Mathew, Luleå University of Technology

Since 1910, the USDA Forest Service, Forest Products Laboratory, has been helping Americans meet their demand for wood in the most efficient, sustainable manner possible. Using the latest in science and technology, FPL’s research scientists are looking at ways to promote clean water, better homes, improved recycling processes, and healthier forests. Many breakthrough technologies that influence the way we live today got their start at FPL.

**Molecular Sponsor**
FPInnovations is Canada’s leading forest products research institute which performs research, technical services and technology transfer activities relating to wood harvesting, wood products, pulp and paper, nanotechnology and bioenergy and chemical production. FPInnovations’ staff numbers more than 550. Its research laboratories are located in Québec City, Montréal and Vancouver and it has technology transfer offices across Canada. For more information about FPInnovations, visit: www.fpinnovations.ca

Masuko Sangyo’s Supermasscolloider is the ultra-fine friction grinding machine that has two ceramic non-porous grinding stones, and clearance between these two stones can be adjusted freely. The Supermasscolloider can grind cellulose fiber into micro-fibrillated cellulose in nano level.

Veeco provides a broad range of atomic force microscopes (AFMs), stylus profilers, and 3D non-contact optical profilers. The application-focused product lines are used in Life Sciences, Physical Sciences, Materials Research and manufacturing control of engineered surfaces.

Nanotechnology Cluster Programme is an efficient network and gateway to the expertise of Finnish nano and micro technologies and future materials. We are linking research and business in order to foster the transfer of new technologies into companies and products. www.nanocluster.fi
“Share the Pride” in your profession, and in your association, by referring your peers and colleagues to join TAPPI — and you’ll receive a free TAPPI PRESS book. Choose from a long list of titles made available for this special program, and take pride in supporting TAPPI’s efforts to strengthen and educate our industry.

The Member Referral program is simple. When joining TAPPI online or via printed application, new members will have the option to list the person that referred them to TAPPI. If that person is YOU, we will contact you immediately to find out which free book you select. The book will be shipped to you at no charge.

By joining TAPPI, the person you refer gets the access to networks and access to knowledge that make TAPPI membership so valuable to thousands of industry professionals - and you will receive a special reward as well. So get the word out about joining TAPPI! Your colleagues gain the benefits of TAPPI Membership, and you get another volume for your library.

Visit www.tappi.org, go to ‘Membership’, and then ‘Refer a Friend’ for complete details.

TAPPI Membership Value

TAPPI's Mission is to engage the people and resources of our Association in providing sound solutions to the workplace problems and opportunities that challenge our current and future members.

What is TAPPI?

TAPPI is the world’s largest association of professionals in the pulp, paper, packaging and converting industries. TAPPI provides members with Access to Knowledge and Access to Networks to gain information, share insights with others who face similar challenges, and contribute more fully to your employer, industry associates and society.

History

Most occupations, professions, and pursuits have professional societies or associations that serve to enhance the knowledge base and activities of the group. For example, physicians have medical associations, and meteorologists have the meteorological society. Such organizations owe their origin to the trade guilds of the Middle Ages, and have flourished particularly in the USA during the past 100 years.

TAPPI’s founding name (from the early 1900’s) was the Technical Association of the Pulp and Paper Industry. In addition to pulp and paper, TAPPI has expanded to allied areas of packaging (such as corrugated and flexible packaging, lamination, adhesions, coatings and extrusion).

Non-Profit Status

As an association, TAPPI is a registered not-for-profit, NGO (Non-Governmental Organization) comprised of about 10,000 member engineers, scientists, managers, academics and others from around the world involved in the areas of pulp, paper, and packaging. TAPPI provides a peerreviewed, scientific forum of quality for its members to gain knowledge and networks to help them in their professional lives.

Purpose

TAPPI provides a forum of exchange for the professionals involved in the industry and conducts activities to keep them informed and connected. TAPPI publishes articles and books and conducts events for peer-reviewed information relevant to the industry. TAPPI's website serves as a ready focal point for the members’ access to knowledge and networks. This access helps improve the industry and its contributions to society.

Why Join TAPPI?

The following are the top ten reasons* members gave for joining TAPPI:

1. www.tappi.org - technical information from members-only website
2. Events - key information at conferences, exhibits, courses
3. Latest business news compiled each week
4. Networking opportunities
5. TAPPI JOURNAL
6. TAPPI Standards and TIPs
7. Paper360° magazine
8. Enhance my personal standing in the industry
9. Discounts on TAPPI events and books/CDs
10. Support for industry programs (scholarships, awards, environmental outreach)

*Results from a recent survey of TAPPI Members. (random, 95% confidence, ±5% MOE)

TAPPI Meets What You Know

Join or Renew your TAPPI Membership Today and Merge Your Career With the Road to Success

- Create and cultivate a strong network of peers
- Share ideas and exchange solutions
- Build lasting, productive relationships in and out of work
- Increase job confidence for industry newcomers
- Fast-track careers for experienced professionals

To Join or Renew

General Information

PLEASE TURN OFF ALL CELLULAR PHONES, BLACKBERRIES AND BEEPERS WHILE ATTENDING SESSIONS

ADA Assistance
Attendees with special needs are encouraged to contact the staff at the TAPPI Registration Desk so TAPPI can make your participation more enjoyable and meaningful.

Antitrust Policy Statement
TAPPI is a professional and scientific association organized to further the application of science, engineering, and technology in the pulp and paper, packaging and converting, and allied industries. Its aim is to promote research and education, and to arrange for the collection, dissemination and interchange of technical concepts and information in fields of interest to its members. TAPPI is not intended to, and may not, play any role in the competitive decisions of its members or their employers, or in any way restrict competition among companies.

Badges
Please wear your badge on your right lapel unless you are provided a lanyard. It is important that the official badge supplied at the time of registration be worn at all times. This practice is a courtesy to your fellow registrants. It also indicates that you have completed registration and may participate in the events scheduled. Admission to technical sessions and workshops will be by badge only.

Information Desk, Message Center and employment Board
A bulletin board is available to post positions available and resumes. Notices of telephone calls, messages, special meetings or meeting time changes can also be posted.

Hosted Events not sponsored by TAPPI
All company hosted events (customer meetings, social events, etc.) that are not officially a part of TAPPI's program may not conduct group functions which compete with scheduled TAPPI activities, such as technical sessions, committee meetings, receptions, award ceremonies, group meals and trade fairs or exhibits.

If you are planning to host a group event, please check with the TAPPI Account Manager to avoid conflict.

TAPPI’s Policy regarding equipment at non-exhibit events
TAPPI prohibits the unauthorized physical display or demonstration of equipment in sessions, workshops, or committee meetings held during TAPPI seminars, short courses, conferences, or other meetings, unless approved by the TAPPI Account Manager. This prohibition does not preclude the graphic non-commercial depiction of equipment via slides, pictures, or video tape. This prohibition is intended to preclude commercialism and to minimize attendee exposure to potentially dangerous equipment and to avoid conflicts with contractual and governmental requirements regarding the use of meeting facilities. All inquiries should be directed through the TAPPI Account Manager on-site.

Lost and Found
Articles which are found should be brought to the Registration Area. Please note the room in which the article was found for the purpose of tracing it to the appropriate owner.

Membership and Publication Information
TAPPI membership dues, membership applications (TAPPI and committee), and requests for TAPPI publications may be obtained the membership booth or at registration.

Nonmembers of TAPPI
If you apply for membership in TAPPI while at this meeting, you will be able to register at the member rate. Take advantage of this opportunity to join TAPPI and save money.

Photographic Consent
Photographs may be taken during this meeting for TAPPI to use for publicity purposes. A registrant’s presence at the meeting constitutes consent for TAPPI to use the photographs in which he or she may appear.

General Information Continued on next page...
General Information  Continued

Ribbons
Association, technical division, and committee officers are requested to pick up their ribbons at the registration desk. Session chairmen and speaker ribbons will also be available at the registration desk.

Use of Personal Video recorders at Technical sessions
The use of personal camcorders to record technical sessions at TAPPI conferences is strictly prohibited. Only TAPPI’s official designee is authorized to video tape sessions.

Should a company and/or individual seek to violate this prohibition, that company and individual will be barred from giving technical presentations at TAPPI sponsored events for a period of two years, that period starting from the date of infraction. TAPPI staff is authorized to have equipment in violation of this policy immediately removed upon detection and shipped to the owner’s principle location at the owner’s expense. Inquiries on this policy should be directed to the TAPPI Meetings Department, c/o TAPPI headquarters.

Important Safety Information

Fire Survival
When you reach your hotel room, ask yourself: Can I close my eyes, hold my breath, and go directly to the nearest fire exit WITHOUT LOOKING in 15 seconds?

You may have to do just that:
- Under emergency conditions
- In smoke
- In darkness
- At 3:00 a.m.

Because panic is the main problem in unfamiliar surroundings, you should prepare for emergencies when you travel. The following information is provided to help you prepare for a hotel fire emergency. Remember that by-products of fire (gases, smoke, etc.) kill more people than fire itself.

Survival Plans
- Familiarize yourself with your new surroundings by checking the emergency exit and escape routes.
- Ensure that doors are unlocked and exit routes are free of obstructions.
- Study the room you are staying in (do the windows open, what is the distance to the ground, etc.).
- Avoid elevators in emergency situations.
- Count the number of doors and walls between your room and the emergency exits. Smoke could obscure lighted signs.

Before and after Leaving the room
- When an alarm sounds, slowly feel the surrounding walls and doors with the back of your hand. If the door is warm, stay as low as possible (to avoid smoke) and open it slowly. If the door and walls are not warm, proceed toward the emergency exit using the most direct route. If the smoke is too heavy, remain in the room.
- Take the key with you. You might find it safer to return to your room.
- If the smoke thickens as you go down the escape stairs, go up one flight and cross over to an alternate staircase.
- If access to the alternate staircase is blocked, proceed to your room and wait for assistance.
- Avoid breaking windows. Broken windows can allow fire and smoke into the room. If a window must be broken or opened, dangle a bed sheet from the window as a signal to firemen. Don’t jump if the fall is more than two stories.

If You Cannot Leave the Room
- Place towels and bedclothes around the door areas. Keep them soaked with water.
- Fill the bathtub and use it as a reservoir for wetting down the entire room. Placing yourself in a filled tub will not offer protection.
- Hold a wet towel around your face to filter smoke.
- Dial the hotel emergency number (0) to tell rescue personnel where you are.

Note: After any emergency, contact your home and office so all can be assured of your safety.
General Safety Tips

To make your conference experience a safe and enjoyable one, please keep the following safety tips in mind. While you are out of the hotel, please know that, like in all cities, awareness and caution are certain to help ensure your safety. A common crime is pickpocketing, with women’s purses being the prime target. Some simple precautions you can take are:

• Never carry all of your valuables in the same place. Keep them secured in a safe deposit box.
• Never walk alone at night, especially to off property locations; there really is safety in numbers!
• Do not leave purses, briefcases or other personal property unattended in public locations. Use hotel services such as a coat check or luggage storage.
• Remove your name badge while out of the hotel. They identify you as an out-of-towner and easy target for crime.
• Women: carry your purse with the strap over your shoulder and across your chest, keeping it closed or latched with the bag portion in front of you. For added protection in crowds, you can rest your hand on top. Be particularly watchful of distractions in revolving doors, elevators or in the public.
• Men: Wrap a heavy rubber band around your wallet to prevent it from being easily slipped out of your pocket or carry it in your front pants pocket.
• If you find that you have become a victim, report the crime to the police.
• Report any suspicious persons or behavior in the hotel or convention center to the registration desk or any TAPPI staff.

Please continue to check www.tappi.org for more information on the 2011 TAPPI International Conference on Nanotechnology for the Forest Products Industry happening in early June, 2011 in Washington, DC.
